## MESSAGE FROM THE GENERAL MANAGER

September 10, 2024

I am pleased to present staff's proposed 2025 Operating Budget for your review and consideration. This proposed budget provides funding for Edwards Aquifer Authority (EAA) operations and programs in support of our mission to manage, enhance, and protect the Edwards Aquifer as directed by the Texas Legislature through the EAA Act (Act).

This proposed budget is divided into and supports two distinct programmatic funds: a General Fund of \$24.78 million in projected expenses, supported primarily by revenue generated through the assessment of a general aquifer management fee (AMF) of \$50 per acre-foot; and an Edwards Aquifer Habitat Conservation Plan (EAHCP) Fund of \$20.36 million in projected expenses, supported primarily by revenue generated through the assessment of a \$40 per acre-foot program AMF. Combined, these two funds make for a \$45.14 million comprehensive budget funded by an overall AMF of \$90 per acre-foot, which represents a 2.27% (or \$2) increase over the previous year overall AMF rate. The purpose of the increase in AMF rate is due to inflationary costs absorbed over the past decade and the anticipated need to absorb costs of the triggering of the Voluntary Irrigation Suspension Program Option (VISPO) forbearance conservation measure for a third year in a row. The proposed rate for each respective programmatic area contemplates the planned expenses and the resulting projected reserve balances for each fund discussed later in this document. Please note that in addition to AMFs, some revenues are generated through collections related to the settlement of compliance matters and through EAA-controlled groundwater permit leases. These non-AMF-generated funds are not used to meet the operational requirements of the

EAA. Instead, the Board has designated this revenue to be set aside in a Conservation/Aquifer Protection Fund dedicated to providing funding for future and/or on-going special projects and programs related to the conservation and protection of the Aquifer.

## EAA GENERAL FUND

The proposed General Fund budget includes \$18 million in revenue and \$24.78 million in expenses (including capital outlays for equipment and debt service), representing a decrease of 17.5% and .6%, respectively, from 2024. The difference between the expenses and revenue results in a projected Net Loss of \$6.8 million, before depreciation, and will require the use of General Fund reserves from prior years. Possible utilization of reserves to cover operating and capital expenses is considered during the budget development process. The General Fund operating reserve balance is discussed in detail later in this document.

	Amended Budget FY2024	Proposed Budget FY2025	Variance	Percent Variance
<b>Revenues</b>				
Operating Revenues	\$ 21,526,700	\$ 17,602,750	\$ (3,923,950)	-18.2%
Non-Operating Revenues	238,954	354,385	115,431	48.3%
Total Revenues	\$ 21,765,654	\$ 17,957,135	\$ (3,808,519)	-17.5%
<b>Expenses</b>				
Capital Expenses *	\$ 1,586,484	\$ 1,544,000	\$ (42,484)	-2.7%
Operating Expenses	23,328,646	23,233,414	(95,231)	-0.4%
Total Expenses	\$ 24,915,130	\$ 24,777,414	\$ (137,715)	-0.6%
<b>Net Income/(Loss)</b>				
<b>(Before Depreciation)</b>	<u>\$ (3,149,476)</u>	<u>\$ (6,820,279)</u>	<u>\$ (3,670,804)</u>	
<i>* Includes both equipment and note principal payments</i>				

### Revenues

#### Operating Revenue

General Fund operating revenue is derived almost solely from the AMF charged to all groundwater withdrawal permit holders. By far, the largest source of EAA revenue is the AMFs paid by non-agricultural groundwater withdrawal permit holders; that is Municipal and Industrial (M&I) users. As set forth in the EAA Act, M&I permit holders pay AMFs based on the amount of groundwater **authorized** under their permits.

In 2025, the proposed General Fund AMF rate would decrease from \$58 to \$50 resulting in a decrease in revenue. Revenue from this source represents about 97.2% of total General Fund revenues in 2025.

Additional AMF-generated revenue comes from agricultural permit holders, who pay \$2 per acre-foot of groundwater **actually pumped** in a year as set forth in the Act. This represents less than 1% of the total budgeted revenue.

### Non-Operating Revenue

Non-operating revenue, representing about 2% of total General Fund revenue, consists of interest income and miscellaneous income. Interest income is expected to decline in 2025 when compared to 2024 due to anticipated decreases in the federal funds interest rate throughout the year. Miscellaneous income (including application fees) is relatively insignificant.

**Total Revenues by Source  
2025**

### **Expenses**

This proposed 2025 General Fund budget represents staff's recommendations to fund the programs and staffing necessary to accomplish the EAA's strategic initiatives and conduct daily operations. Expenditures (operating expenses, capital outlay and debt service) for 2025 total approximately \$24.78 million, representing a .6% decrease from 2024. In 2025, approximately 56% of the budgeted General Fund expenses is associated with employee salaries and benefits. Another 18% is for professional and technical services. The remaining categories, which include expenses such as Conservation Initiatives, Building Debt Service, Supplies, Property Services, Capital Outlays, and Other Services, make up the remaining 26% of total expenditures. The budget provides specific focus on funding strategic initiatives related to aquifer sustainability: water quality and quantity; aquifer protection and research; a first responder education program; and an abandoned well awareness, prioritization, and closure program. Funding of expenses for the education outreach center (aimed at raising awareness of the Edwards Aquifer and inviting greater inclusion in the EAA mission across the region) and a dedicated field research park for aquifer data collection and research (principally for conducting long-term studies focused on aquifer sustainability and to develop, research and implement practices that lead to enhanced water quality and quantity of

recharge to the aquifer) continue and are included in the proposed 2025 budget, as are plans to expand the EAA's Automated Meter Reading program by providing the opportunity for irrigator volunteers to participate in the program and to explore pilot participation projects with potential industrial or municipal users. The proposed 2025 budget also includes a cost share agreement between EAA and the City of San Antonio (City) by which the EAA is partly reimbursed for providing technical support and monitoring services to support the City's Edwards Aquifer Protection Program.

**Expenses by Category  
2025**

## General Fund Budget Highlights

The following is a list of Operating Expense highlights for 2025 that are over \$100,000, by project.

- Attorney services (as may be necessary) \$525,000
- Employee cost-of-living/merit adjustments (incremental) 454,726
- USGS Data Collection 380,000
- Interformational flow studies 300,000
- Laboratory services 290,000
- Outreach (social media/advertising)/Rebranding Initiatives 255,000
- Diffuse Recharge Research 250,000
- Property, Casualty and Workers Compensation Insurance 227,800
- Modeling updates 225,000
- Precipitation enhancement 175,000
- Legislative services 150,000

• Database management/consulting assistance	150,000
• Cloud Services	150,000
• Website Development/Maintenance	150,000
• Education Outreach Center – Morgan’s Wonderland Camp – Facility rent	139,164
• Field Research Park/Hydrologic budget studies	130,000
• Electrical Services (building)	116,886

## Capital Budget and Debt Service

The proposed 2025 General Fund operating expenses described above include a capital budget to fund those individual items that cost more than \$5,000 and have an expected life span of at least one year. The proposed 2025 Capital/Debt Service Budget is approximately 2.7% lower than the 2024 Amended Capital/Debt Service Budget. Following is a list of the proposed 2025 General Fund Operations Capital Budget highlights.

• Conservation Easement Assessment Tool	\$350,000
• Building/infrastructure improvements	300,000
• Debt service (building note principal) <sup>1</sup>	260,000
• Vehicle replacements (3); Off-road easement monitoring vehicle (1)	211,500
• Water sampling/logging/monitoring equipment	167,500
• Computer hardware/software	155,000

## Designated Funds

In addition to the EAA’s standard operating expenses, funds have been designated to meet specific objectives set forth by the Board of Directors. A summary of each of these designations is provided below. Activities related to the fulfillment of each fund’s purpose have been included in the 2025 budget.

### Abandoned Well Closure Assistance Fund

The Abandoned Well Closure Assistance Fund was established in 2010 as a funding source to provide qualified, low-income well owners financial assistance to resolve abandoned well compliance matters. For 2025, this program budget does not include proposed funding for specific projects.

### Conservation/Aquifer Protection Fund

The Conservation/Aquifer Protection Fund receives revenue through compliance settlement agreements and EAA permit lease revenue which are used for funding future and/or on-going projects and programs related to the conservation and protection of the Aquifer. The EAA does not use any of the revenue derived from compliance settlements for general fund operating expenses or capital purchases. For 2025, this program budget includes \$100,000 proposed funding for projects managed by the Edwards Aquifer Conservancy, a supporting non-profit organization of the EAA.

<sup>1</sup> Interest in the amount of \$72,881 is budgeted as an operating expense.

### General Fund Operating Reserve

The proposed 2025 budget assumes an ending operating reserve of \$15.1 million, which includes an undesignated portion of \$12.5 million. The ending operating reserve and undesignated operating reserve balances are 61.1% and 50.4%, respectively, of the proposed 2025 budgeted expenses. As discussed previously with the Board, building and maintaining a higher reserve balance now and in the future is contemplated as part of a larger strategy to build financial capacity within the budget to leverage and support collaborative initiatives to protect, preserve and enhance aquifer sustainability, including yet-to-be-identified costs associated with a renewed EAHCP that is anticipated to be implemented beginning in 2028.

## **EDWARDS AQUIFER HABITAT CONSERVATION PLAN FUND**

On March 18, 2013, the United States Fish and Wildlife Service (FWS) issued an Incidental Take Permit (ITP) to cover the use of the Edwards Aquifer and associated spring systems. The ITP is supported by the EAHCP and runs through March 2028.

In 2013, the EAA began implementing the EAHCP, which consists of a number of measures designed to maintain minimum springflows at Comal and San Marcos springs for the benefit of protected species, to improve habitat conditions at those springs, and to provide for artificial refugia in the event conditions warrant the removal of endangered species from their natural habitat.

The proposed 2025 EAHCP budget includes approximately \$14.66 million in revenue and \$20.36 million in expenses, resulting in a Net Loss of approximately \$5.7 million, before depreciation, and will require the use of EAHCP reserves from prior years. Possible utilization of reserves to cover operating expenses is considered during the budget development process. The EAHCP reserve balance is discussed later in this document. The EAHCP expense budget is derived largely from Table 7.1 of the EAHCP. For 2025, the EAHCP budget is greater than Table 7.1 by \$4,422,054 largely due to the funding Voluntary Irrigation Suspension Program Option (VISPO) forbearance payments in 2025.

	<b>Amended Budget FY2024</b>	<b>Proposed Budget FY2025</b>	<b>Variance</b>	<b>Percent Variance</b>
<b>Revenues</b>				
Operating Revenues	\$ 11,545,500	\$ 14,452,200	\$ 2,906,700	25.2%
Non-Operating Revenues	356,558	208,725	(147,833)	-41.5%
Total Revenues	\$ 11,902,058	\$ 14,660,925	\$ 2,758,867	23.2%
<b>Expenses</b>				
Capital Expenses	\$ -	\$ -	\$ -	0.0%
Operating Expenses	21,341,216	20,359,901	(981,315)	-4.6%
Total Expenses	\$ 21,341,216	\$ 20,359,901	\$ (981,315)	-4.6%
<b>Net Income/(Loss) (Before Depreciation)</b>	<b>\$ (9,439,158)</b>	<b>\$ (5,698,975)</b>	<b>\$ 3,740,183</b>	

## EAHCP Revenues

Operating revenue to fund the activities of the EAHCP is primarily derived from a program AMF, which is assessed against all M&I permit holders based on the amount of groundwater withdrawal permits authorized for 2025. The program AMF, which represents approximately 95.3% of total revenue, is proposed to increase from \$30 to \$40 per acre-foot for 2025. In addition to revenue collected through the assessment of program AMFs, the 2025 EAHCP Program budget includes pledged revenue from other entities. Seven organizations – the Guadalupe Blanco River Authority, Union Carbide, CPS Energy, the San Antonio River Authority, the City of Victoria, the Guadalupe Basin Coalition, and the Nueces River Authority – have pledged their intent to financially assist the EAA in the implementation of the EAHCP. Total revenue from these sources is budgeted at \$486,000, approximately 3.3% of total revenue, in 2025. Non-operating interest income, which represents approximately 1.4% of total revenue, is expected to decrease in 2025 from 2024, as previously discussed in this document.

**Total Revenues by Source  
2025**

## EAHCP Expenses

The proposed 2025 EAHCP Fund budget totals approximately \$20.4 million, a 4.6% decrease from the amended 2024 budget. This budget will fund the following conservation measures:

Springflow Protection conservation measures totaling about \$14.6 million account for about 71.9% of the EAHCP budget in 2025.

- VISPO requires payment to Edwards groundwater withdrawal permit holders for forbearance of enrolled water when aquifer levels decline to certain critical levels. Based on current aquifer conditions, it is likely that suspension payments related to VISPO will be made in 2025 and are included in this proposed budget. This proposed 2025 budget includes funding for VISPO stand-by payments in the amount of \$2.3 million and VISPO

forbearance payments in the amount of \$6.7 million. If the aquifer is above the requisite critical level on October 1, 2024 and VISPO does not trigger a forbearance year, there will be no suspension payments and the final proposed budget for adoption will be decreased by \$6.7 million.

- San Antonio Water System’s (SAWS) aquifer storage and recovery (ASR) project is another significant EAHCP Springflow Protection conservation measure. Under this program, the EAA acquires Edwards groundwater for the purpose of injecting into the SAWS ASR for storage and use during a drought of record. The injection goal of 126,000 acre-feet of groundwater into the SAWS ASR was met in 2020; therefore, the proposed 2025 budget includes only ASR lease and forbearance agreement payments in the amount of \$5.7 million, but no ASR operation costs.

The remaining 28.1% of the EAHCP budget will fund various activities and work plans to be implemented by the signatories to the plan during 2025: the EAA, the City of New Braunfels, the City of San Marcos, the City of San Antonio through SAWS, and Texas State University.

**Expenses by HCP Measure  
2025**

## EAHCP Reserves

The proposed 2025 budget assumes the triggering of a VISPO forbearance event, which would result in an EAHCP ending reserve balance of \$5.4 million. The EAA’s goal has been to maintain a minimum EAHCP ending reserve balance sufficient to help absorb costs associated with the potential triggering of ASR and VISPO springflow protection measures during historic drought years, more specifically to cover up to four (4) VISPO trigger events over the term of the EAHCP. The potential

2025 VISPO triggering event for forbearance represents the fourth VISPO trigger during the current ITP term. Future triggering events, however, could necessitate further increases to the EAHCP Fund AMF rate to ensure continued coverage through the remainder of the current EAHCP term, which concludes in March 2028. As previously mentioned, the setting of AMF rates, by programmatic area, considers reserve balances to offset the need to sharply increase the overall AMF rate in any given fiscal calendar year.

## **Summary**

In conclusion, I am confident that this proposed budget for 2025 sufficiently provides for the EAA's strategic initiatives identified by the Board of Directors while demonstrating responsible fiscal stewardship on behalf of the EAA permit holders, who largely fund our operation. I want to thank our permit holders for their continued collaboration, EAA staff for its hard work in developing this budget, and the Board of Directors for its steadfast diligence to upholding fiscally sound and responsible standards of management practices at the EAA. If you have any questions, please call me at (210) 477-5143, or Marc Friberg, Deputy General Manager, at (210) 477-8522.

# **EXECUTIVE**

## Executive Division

## Executive

The Edwards Aquifer Authority (the “EAA”) is governed by a 17-member board of directors. Fifteen of these directors are voting members, elected from single-member districts. One director is appointed by the South Central Texas Water Advisory Committee (SCTWAC) and one is appointed on a four-year rotating cycle from Medina and Uvalde counties.

The Executive Office, consisting of the General Manager, Deputy General Manager, Assistant to the Board Secretary, and the Executive Assistant manage all aspects of EAA operations. Additionally, the Executive Office oversees the activities of the EAA’s outside counsel, as well as, the strategic policies/direction of the EAA. The Executive division is comprised of the following departments:

-  **General:** Expenses not directly associated with a specific operational program, such as salaries and benefits, conferences and training, meeting and travel, memberships, and subscriptions are reflected in this department.
-  **Board of Directors & South Central Texas Water Advisory Committee (SCTWAC):** The board determines EAA policies and hires the General Manager to manage all EAA operations. The SCTWAC is made up of representatives from downstream counties to interact with the EAA when issues related to downstream water rights are addressed, and conducts a biennial report assessing the effectiveness of the EAA.
-  **Legal Services:** The board hires a general counsel to provide comprehensive legal services regarding all aspects of EAA operations. Executive Office staff provide a centralized, point-of-contact for EAA counsel, and serve as liaison between the board and legal counsel to manage work referred to counsel.
-  **Strategic Policy:** The EAA was created by the Texas Legislature and as such maintains ongoing communications with the legislature and other political and governmental entities. These include, but are not limited to, various committees of the House and Senate, including the Edwards Aquifer Legislative Oversight Committee, regional water planning groups, groundwater management areas, and other water-related regulatory or planning entities. This program coordinates activities such as the gathering and sharing of pertinent information with legislative bodies and other governmental entities and assisting in the planning of water management on a regional basis for both groundwater and surface water to help meet future needs.

# **ADMINISTRATION & FINANCIAL SERVICES**

## Administration & Financial Services Division

## Administration & Financial Services

The Administration & Financial Services division serves the entire staff of the EAA by providing all organizational support activities and by ensuring all EAA teams have the supplies, equipment, facilities and technology available to perform their duties. This includes meeting the organization's financial, technological, and human resource needs to keep the organization operating efficiently. The Administration & Financial Services division is comprised of the following departments:

-  **General:** Expenses not directly associated with a specific operational program, such as salaries and benefits.
-  **Accounting:** The Accounting program conducts all activities associated with payroll, accounts payable, accounts receivable, procurement and contract administration, budget, audits, investment activities, property, casualty, and workers' compensation insurance.
-  **Authority Operations:** The EAA Authority Operations program supports the entire organization by overseeing building improvements, facility maintenance, vehicle maintenance, office equipment purchases and leases, and utilities.
-  **Business Diversity/Inclusion:** The Business Diversity/Inclusion program develops, implements, manages and monitors the EAA's business diversity initiatives and strategy by working as a community outreach partner in collaboration with other local agencies and businesses to enhance engagement of minority-owned or woman-owned businesses (MWBs) in contract awards. Through this endeavor, staff strives to meet the EAA aspirational goal of awarding at least 30% of its contracts to MWBs.
-  **Human Resources:** The Human Resources program administers all aspects of recruiting and retaining talent to the EAA. These activities include staffing, recruitment, pre-employment and post-employment processing, employee benefits administration, compensation, safety training, staff development, as well as managing the agency's records retention program, administrative support function and college internship/work-study program.
-  **Information Technology:** The Information Technology program supports and administers all technology resources to ensure EAA staff has high quality and dependable technology to accomplish its mission. Funding includes access to technology resources including personal computers, servers, databases, imaging, printers, sensors, networking, programming and professional grade software to empower staff. In addition, this program provides technology services including planning, purchasing, maintenance and security while offering guidance on new and emerging technologies to empower staff as they build the next generation of the EAA.

 **Records:** Through centralized organization and electronic records management software, the Records program area ensures the EAA maintains all records according to an adopted plan. In accordance with this plan, records management staff ensure proper filing, archival, retrieval and destruction of EAA files. Records management staff members also respond to public information requests.

# **AQUIFER MANAGEMENT SERVICES**

## Aquifer Management Services Division

## Aquifer Management Services

The Aquifer Management Services Division is subdivided into three program areas that support the mission of the Edwards Aquifer Authority. Specifically, research and groundwater modeling activities are conducted by the Aquifer Science Research and Modeling Program. This program strives to continually improve the overall understanding of aquifer behavior with the goal of informing policy makers using sound science that contributes to managing the aquifer today and in the future. The Data Management and Data Collection Program is tasked with collecting rainfall, weather, and water level data across the region through use of telemetered and manually collected data. This program is also responsible for the proper storage and qualification of these data. The Aquifer Sustainability Program has charge of annual conservation easement inspections held by both the City of San Antonio and the EAA across the region as well as responsibility for geographic information systems (GIS) services. Easement protected lands currently total over 170,000 acres and 100 different properties. The division is also responsible for the EAA's Field Research Park, a 151-acre Recharge Zone property that is home to a series of sustainable land management practices used as both a demonstration and research endeavor. These practices are aimed at contributing to aquifer sustainability and enhancing the understanding of aquifer and groundwater behavior in the region. The division comprises the following departments:

-  **General:** Expenses not directly associated with a specific operational program, such as salaries and benefits, conferences and training, meeting and travel, memberships, and subscriptions are reflected in this department.
-  **Aquifer Science Research:** EAA funded research projects are conducted to address questions directly related to understanding and managing of the Edwards Aquifer. Information collected through the program is used to improve our understanding of the aquifer and continually refine the conceptual model of the aquifer system. Subsequently, these refinements are carried forward to improve EAA groundwater models and protection methodologies, allowing for better management and increased sustainability of the resource. This group is also responsible for collecting multiple data sets, such as water chemistry in support of the research.
-  **Aquifer Sustainability:** Through the Edwards Aquifer Protection Program, staff monitors City of San Antonio (City) and EAA-held conservation easements and assists other entities with conservation easement acquisitions and monitoring regionally. The City and the EAA inter-local agreement provides for a reimbursement to the EAA to perform conservation easement monitoring and geologic assessment services under the City's Edwards Aquifer Protection Program. The City reimbursement (\$246,141) is budgeted in this department as an offset to expenses incurred and for reimbursement of various personnel costs recorded in the General category of expenses above. Other areas of responsibility include annual maintenance and data collection at the four recharge dams in Medina County. Additionally, through this program, the EAA provides cost share incentives to landowners who perform brush control (generally Ashe juniper control) on properties located on the Edwards Aquifer Recharge Zone. The EAA works in cooperation with the U.S. Department of Agriculture – Natural Resources Conservation Service to support brush control by

providing partial reimbursement for NRCS approved projects. Funding for range management and land management research projects, as well as educational workshops related to the work performed at the Field Research Park is also included in this program area as part of a new incentive to restore the water holding capacity of soils in the region.

 **Data Management:** Data management refers to the overall process of properly collecting, storing, analyzing, quality checking, and retrieving the multiple data streams under the AMS Division umbrella. This program is also responsible for developing and maintaining standard procedures for data collection and storage. Another component of data management is focused on the use of telemetry systems to transmit water level, rainfall, weather, and real-time water quality data directly to EAA databases. The telemetry network has proven to increase staff efficiency and will continue to be refined and upgraded over time. Telemetered data are used for multiple purposes, to include evapotranspiration estimates, recharge estimates and production of high-resolution rainfall data for the region.

 **Field Research Park:** Through the Field Research Park the EAA is working to develop long term monitoring and quantification methodologies for practices that potentially affect aquifer system behavior and groundwater sustainability. For example, data collection associated with rainfall, solar radiation, temperature, wind speed, soil moisture, and vadose zone water content have been initiated and will be continued and potentially expanded over time. Other pertinent ongoing data collection efforts include groundwater levels, water chemistry, and vegetation mapping. Most recently, spectral imagery data are being collected to assess vegetation health and response to land management practices. This site affords the EAA the opportunity to make long-term observations that will improve our understanding of system behavior under various atmospheric and hydrologic conditions. The Field Research Park is also the site for development and quantification of land management techniques that have the potential to positively impact water quality and quantity and contribute to sustainability of the system.

 **Modeling:** Modeling is conducted using hybrid machine learning and physics-based computer models developed specifically for the Edwards Aquifer region. The models are designed to improve groundwater management capacity and to support analysis of climate change scenarios in support of the EAA HCP. These models are periodically refined through ongoing research as conducted by the research and data collection process. Additionally, new modeling techniques are being applied using sub-regional surface water/groundwater coupled models that hold promise for improved management of the system in the future.

**Division Expenses, by Classification:**

Expense Classification	2023 Actual Expenses	2024 Amended Budget	2024 Estimated Expenses	2025 Proposed Budget

## **COMMUNICATIONS & DEVELOPMENT**

## Communications & Development Division

## Communications & Development

The Communications & Development division takes a proactive, strategic approach to communication and outreach across all EAA operations to foster greater cohesion, collaboration, and consistency in public information dissemination. Additionally, the division is responsible for the administration of the Edwards Aquifer Conservancy (EAC), including planning and execution of activities focused on building awareness and financial support of the EAA and its mission. The Communications & Development division is comprised of the following departments:

-  **General:** Expenses not directly associated with a specific operational program, such as salaries and benefits, conferences and training, meeting and travel, memberships, and subscriptions are reflected in this department.
-  **Edwards Aquifer Conservancy:** The EAC solely supports and benefits the work of the EAA, including the establishment of programs and practices that protect habitat and species, sustain agricultural practices, promote water conservation, and support the development of water management solutions within the diverse Edwards Aquifer region. In 2024, the EAC will continue to resume development efforts to generate funds to support Next Generation projects, including funding for the Education Outreach Center and The Field Research Park and Observatory. Additionally, after hosting a successful inaugural Gala in 2023, the EAC will stage a second special event gala fundraiser in 2024, with the purpose of generating income for supporting the hiring of a full-time executive director and staff. The Gala will encompass supporters to date, as well as serve to attract and add to the cadre of potential funders.
-  **Public Information:** To convey its mission in and throughout the community the department spearheads public information campaigns, employs a speakers' bureau, and undertakes media relations, marketing, social media & community outreach programs throughout the region. Furthermore, the EAA's communications team provides support and materials as needed to aid in the individual missions of all EAA programs, in terms of developing and sharing program-specific information with permit holders, stakeholders, and other interested parties. A rebranding/imaging exercise, undertaken in 2023, positions the department to meaningfully engage in the refreshing of the main EAA website in 2024, and continuing into 2025. Rebranding will also include the introduction and promotion of a new EAA logo, the third in its history. We will continue to promote the EAA through already vigorous Social Media efforts, including the use of Facebook, Twitter, LinkedIn, Instagram and the NextDoor social platform.
-  **School Education:** The EAA education program works with students and teachers in the region to educate them on water-related issues, specifically as they relate to the Edwards Aquifer. Funds are budgeted in this program for educational materials, website programming offerings, workshops and field trips for students and area teachers at the Education Outreach Center. Since the opening of the Education Outreach center in 2022, the focus in 2025 will continue to be on generating planned school visits, focusing on

executing a school-specific publicity and outreach plan for the EOC -- a primary outlet for education and information presented in an interactive and engaging manner for people of all ages.

# **EXTERNAL & REGULATORY AFFAIRS**

## External & Regulatory Affairs Division

## External & Regulatory Affairs

The External & Regulatory Affairs division objective is to help effectively manage, enhance, and protect the Edwards Aquifer by: managing production from the aquifer through a comprehensive permitting, metering, and drought management system; serving as a resource to the regulated community and area stakeholders; protecting and conserving the aquifer through the Recharge Zone Protection and Conservation programs; and increasing awareness and understanding of the EAA through intergovernmental and non-governmental outreach efforts, including communicating critical issues clearly and concisely, increasing pro-active efforts to build support of the EAA mission throughout the region, and helping to ensure good communication. The External and Regulatory Affairs division is comprised of the following departments:

-  **General:** Expenses not directly associated with a specific operational program, such as salaries and benefits, conferences and training, meetings and travel, memberships, and subscriptions are reflected in this department.
-  **Abandoned Well Closure:** Permanently closing or rehabilitating abandoned wells is the responsibility of the property owner. However, the EAA is committed to identifying alternative funding mechanisms, including needs-based financial assistance to help bring existing wells into compliance with the law and to protect the water quality of the aquifer.
-  **Elections:** The Edwards Aquifer Authority Act requires the EAA to hold elections for director positions on the general election day in November of every even-numbered year. EAA directors serve staggered four-year terms.
-  **Meters:** Meters are required on all non-exempt Edwards Aquifer wells. The meter program manages a network of EAA-installed meters on approximately 600 irrigation wells and maintains records for approximately 1,000 industrial and municipal wells. EAA staff's goal is to check and read every meter at least once a year, and more often, as appropriate. The meter program gathers and maintains data related to meter registration and groundwater use reporting for the EAA. In addition, the program manages the EAA's Automated Meter Reading and Meter Accuracy Verification programs.
-  **Recharge Enhancement:** The Recharge Enhancement program oversees the EAA's precipitation enhancement (cloud seeding) program to increase recharge and reduce irrigation demand.
-  **Regulatory Affairs and Water Resources:** The *Regulatory Affairs* program administers the EAA's compliance and enforcement program, and several other regulatory programs related to groundwater production and protection. This includes regulating the metering and reporting of groundwater withdrawals, the storage of regulated materials, aboveground and underground storage tanks, and the overall, general enforcement of all EAA rules. The program oversees water quality-oriented regulatory matters, including assisting agricultural aboveground storage tank owners and operators with proper

containment measures and operational practices. This program also ensures permit holders are in compliance with all EAA Rules for such things as groundwater use reporting. As such, funding for enforcement of non-compliance is also included as part of this program area. The **Water Resources** program focuses on the administration of both groundwater withdrawal and well construction permits and water conservation. This program administers EAA groundwater withdrawal right permits, issues groundwater well construction permits, manages and helps enforce pumping reductions mandated with the EAA Act and EAA rules during times of drought, enforces well construction and use standards, and helps to facilitate conservation through an EAA groundwater conservation program, which includes an internal grant program. The Water Resources program also helps to address increasing water demands, extreme weather variability, and mandated reductions in pumping during critical times. The EAA's Groundwater Conservation Plan and related programs help users improve water-use efficiency. In addition, the program also helps administer the Edwards Aquifer Habitat Conservation Plan's Springflow Protection Programs – including the Aquifer Storage and Recovery Springflow Protection Program and Voluntary Irrigation Suspension Program Option.

**Division Expenses, by Classification:**

## Threatened & Endangered Species Division

\* NOTE: The Chief Science Officer and Environmental Scientist II budgetary dollars are included in the External and Regulatory Affairs division budget. However, these positions report to the Executive Director - Threatened & Endangered Species.

## Threatened & Endangered Species

The Threatened & Endangered Species division is responsible for administering and managing all activities related to the Edwards Aquifer Habitat Conservation Plan (EAHCP). This includes managing all EAHCP related activities associated with the Edwards Aquifer Authority, the City of San Marcos, the City of New Braunfels, Texas State University, and the San Antonio Water System. The Threatened & Endangered Species division is comprised of the following programs:

-  **Program Administration:** includes all expenses associated with the program management team. This includes salaries and benefits, travel costs, contractual professional services, EAHCP related meeting and miscellaneous expenses.
-  **Springflow Protection:** Springflow Protection includes those measures designed to protect and maintain spring flow in the Comal and San Marcos spring systems. These activities include the Regional Water Conservation Program, the VISPO, and the SAWS-ASR program.
-  **San Marcos Springs:** San Marcos Springs expenses include all minimization and mitigation measures as well as monitoring measures in the San Marcos spring system. This includes habitat restoration, invasive plant and animal species control, riparian restoration, water quality protection measures, enhanced water quality monitoring, and biological monitoring.
-  **Comal Springs:** Comal Springs expenses include all minimization and mitigation measures as well as monitoring measures in the Comal spring system. This includes habitat restoration, invasive plant and animal species control, riparian restoration, water quality protection measures, flow-split management, enhanced water quality monitoring, and biological monitoring.
-  **Applied Research:** Research expenses in this category are designed to support program adaptive management.
-  **Refugia:** Refugia includes costs primarily associated with the USFWS providing refugia operations and research on covered species at the San Marcos Aquatic Resources Center (SMARC) and the Uvalde National Fish Hatchery (UNFH). Other expenses include annual reporting, meetings and presentations.

**Division Expenses, by Classification:**
