Subject: City of Selma_2017 Over-Pumping_Record of Conversation

George –

Thanks for the conversation this morning. My understanding from that is that Selma may pay 5% of the settlement payment along with a commitment to not exceed our authorized annual withdrawal amount for the next two years and to attend an Edwards Aquifer Well Owner's Workshop on a date to be provided by EAA later. Selma will also perform a city-wide water leak audit before the end of this calendar year.

With that understanding, please advise on formalities of effecting this agreement, including the exact amount that would be due by July 13th, 2018.

Thanks.
